

technical details

wattage

40 watt bulbs (or equivalent) recommended

electrical

all electrical components used in our lights have been fabricated in accordance with  regulations. please note that our lights are not  listed for use outdoors or in damp locations.

all scrap light assemblies can be UL listed for commercial use for an additional \$49 each.

wiring

two types of cords are available, both of which are available in black and white colors. stock cord lengths are 8', with custom lengths available upon request for an additional \$49. each hardwired cord-sets are ready to wire and include a 5" diameter ceiling canopy kit in the matching color. plug/switch swag-sets are 15' in length and plug into standard US electrical outlets. they also have a switch integrated into the cord about mid-length. swag-sets are available for other countries as well.

fire-rating

scrap light shades are treated with No-Burn® class A fire retardant.

all No-Burn® spray coatings are GREEN with Low to Zero VOCs, and all carry a Class A Fire Rating.

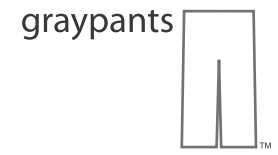

No-Burn® now has an accredited ICC-ES report #1838.

the Testing Standards met include those published by the following organizations*:

- * ASTM
- * Underwriters Laboratories
- * Underwriters Laboratories Canada
- * California State Fire Marshal

details

scrap light shades are non-toxic and made entirely from repurposed cardboard boxes. due to our unique manufacturing process, graypants lampshades can vary slightly in shape + size.

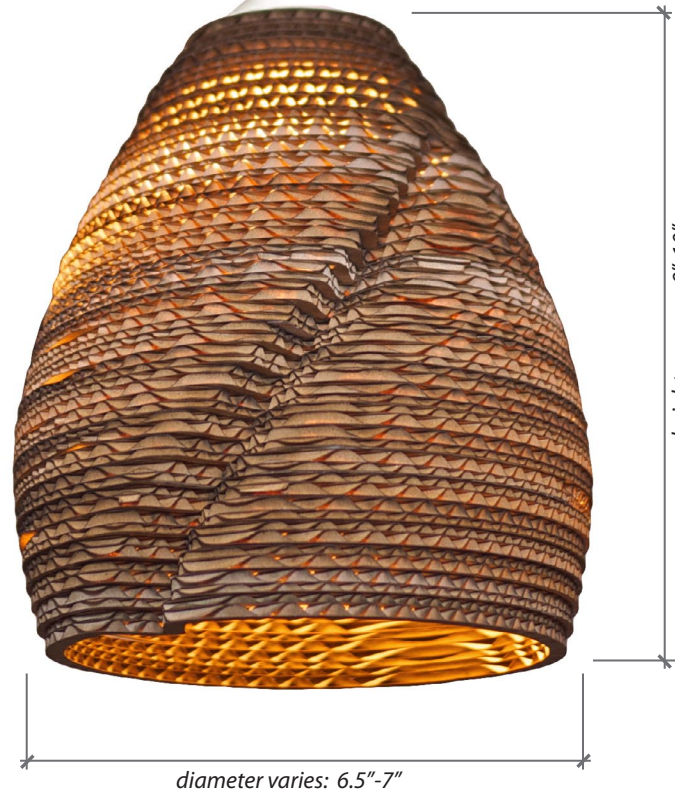

creating a brighter now.

instilling new spirit into salvaged pieces of corrugated cardboard, a scrap light's lively play on light and shadow invigorates once lifeless materials.

the bean shape pendant shade subtly references nature's design of the coffee bean. light filters through the layered cardboard in a unique + dynamic way and offers a reminder + source of inspiration to those who engage it.

a shade simply inspired by....

the bean

the bean.
